

LC30 GRENADE SIGHT

40mm low and medium velocity grenade sight for
350m and 500m respectively

FROM RING SIGHTS

DEVELOPMENT

Ring Sight LC30 is a unit powered reflex sight that gives first hit probability, to the ballistics full range.

DESCRIPTION

Solid glass construction for excellent durability and precision with no chance of internal misting. No batteries but able to be used in all lighting conditions day or night. NVG compatible. LV from 0m to 350m at 25m intervals. Zeroing bases available and sight mounting options. Eye relief not critical but optimum 200mm to enable NVG goggles to be worn.

STATUS

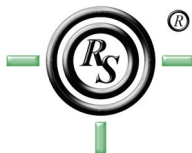

- Production of low velocity as required.
- Trial sights available at cost price.

SPECIFICATION

Aperture: 30 x 10

Weight: 272 grams includes 2 degrees zeroing base and quick release
